

# Let Your Love Grow

When a loved one passes, we feel an innate desire to return them to the earth. However, cremated ashes are actually harmful to our environment when planted or scattered. Until now, Let Your Love Grow is the world's first all-organic mixture designed to offset the natural toxicity of ash and invite new life to flourish.

Let Your Love Grow fosters joy and remembrance as we give our loved ones a new life.

## Life Begins Anew

Let Your Love Grow is an organic mixture that blends soil and ash to create a nourishing environment scientifically proven to support plant life. Whether you want to plant a living memorial for your loved one or scatter their ashes across a favorite place, LYLG helps you usher them into a new life.

### Included in your kit:

- 1 biodegradable cardboard container
- 1 bag containing the Let Your Love Grow organic mixture with biodegradable twist tie
